

# A Repair is Never Complete Until It's Tested! When It Comes to AC Drives, Electrical South Excels with its **100HP AC Load Testing!**

It's important to know that your drive was properly tested!  
The ability to test your drive to its rated load assures you

- all failure modes are identified & repaired
- the output modules are fully exercised
- the overcurrent circuits fully tested
- it will spin your motor to capacity when you install it!
- 25HP, 50HP, 75HP, MORE? Not a problem for US!
- Allen Bradley, Reliance, Siemens, ABB...we do 'em all!

Developed by our highly experienced drive engineers, our proprietary load center:

- runs your drive to its rated current output
- monitors voltage & current on each phase
- digital readouts + analog graphic display
- auto mode steps from 'no load' to '100%' in 4 steps (then repeats) to vary demands on your drive for a thorough workout
- eliminates the risk of start-up problems
- state-of-the-art touchscreen allows our tech complete control of the loading applied to your valuable equipment and puts the measures of proper drive performance at his fingertips

Your repaired drive is protected by our comprehensive warranty, but with thorough testing like ours, you won't need it!
